Forecast for Sunday 20 Jun 2021

Weather: Low cloud spread across much of the park with outbreaks of rain. Some heavier bursts of rain early this morning before largely fading away by mid-morning, though the risk of isolated spells of drizzle continues through the day. The cloud will slowly begin to breakup and lift from mid-afternoon onwards, with isolated clear spells possible come the evening, most likely across the south of the area.

Chance of cloud free mountain/hill tops above 600m: 10% chance during the morning and early afternoon, rising to 60% by 15:00.

Visibility: Cloud bases widely 200-300m this morning. This lowering to 100-200m in association with any rain first thing, which will bring very poor visibility. Visibility improving during the afternoon, with cloud bases steadily lifting above the summits but with patches of cloud remaining at 600-800m.

Freezing Level*	2500m	2600m	2500m	2500m	2600m	2600m	2500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Very poor visibilities across a wide area this morning will give hazardous conditions. Rain in the morning will also make paths and slopes wet and slippery. Caution is advised through the rest of the day as reduced amounts of sunlight will prevent things from drying out.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 20 Jun 2021	9mm	9mm	9mm

Forecast for Monday 21 Jun 2021

Weather: Another wet start to Monday with a band cloud and rain, sometimes heavy, moving across the park through the early hours. This will remain for most of the day, only fading from late the evening onward.

Maximum wind: On the summits, northeasterly 20mph and gusting 30mph.

Chance of cloud free mountain/hill tops above 600m: 40% through the day

Visibility: Cloud bases again largely 300-400m and dropping further in the associated rain. This will result in poor visibility on summits, and very poor in precipitation.

Temperature: **Valleys:** Plus 11 Celsius, rising to plus 16 Celsius.
At 600m: Plus 6 Celsius, rising to plus 9 Celsius.
Freezing level: Above the summits throughout the day.
